DETAILED ACTION

1. In response to the interview of August 26, 2003 the Amendment has been received September 8, 2003.

The specification has been amended.

Fig. 1 has been amended.

Claims 17-43 are currently pending in this application.

EXAMINER'S AMENDMENT

2. In amendment received under 37 C.F.R. 1.111 of September 8, 2003 claims 21 and 44 are missing. To correct this matter, an examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with J. Preta (Reg. No. 43,017) on December 4, 2003.

The application has been amended as follows:

In the claims, between claims 20 and 22, change "anode material has a thickness between 1 μm and 25 μm " to -- 21. The x-ray anode in accordance with claim 17, wherein said anode material has a thickness between 1 μm and 25 μm . --

After claim 43, change " promoting intermediate layer." to -- 44. The method of claim 43, wherein the intermediate layer is an adhesion-promoting intermediate layer. --

Allowable Subject Matter

3. Claims 17-44 are allowed.

4. The following is an examiner's statement of reasons for allowance: Claims 16-44 are allowed because prior art fails to disclose or make obvious an X-ray anode comprising a diamond window having a thickness in a range of 300 μm to 2000 μm as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harding (US Patents 6,359,968 B1 and 6,185,277 B1), Okada et al. (US Patent 6,103,401) and Ezaki et al. (US Patent 6,366,639 B1) disclose the diamond windows for X-ray sources.
